Shankar S

.NET Developer | C#, ASP.NET Core, SQL Server

+91 6380389479 | shankar89479@gmail.com | linkedin.com/in/shankar-s-147b31232

PROFESSIONAL SUMMARY

Backend-focused .NET Developer with approximately 1 year and 8 months of professional experience on a large-scale enterprise insurance ERP serving the Saudi Arabian market, working in the Non-Motor Claims domain. Develops and maintains REST APIs and service-layer business logic in C# and ASP.NET Core, supported by Microsoft SQL Server stored procedures, triggers and transaction-scoped processing. Has contributed to improving claims dashboard performance on large datasets and to the ongoing modernization of legacy application code toward an API-based architecture on .NET 10 / ASP.NET Core 10.

TECHNICAL SKILLS

- **Languages and Frameworks:** C#, .NET, ASP.NET Core (ongoing modernization toward .NET 10 / ASP.NET Core 10)
- **Backend:** REST API development, backend services, service-layer business logic, external middleware API integration, transaction handling with TransactionScope, Windows services, scheduled processing, legacy application modernization
- **Database:** Microsoft SQL Server, T-SQL, stored procedures, triggers, transactions, SQL Server Agent jobs, indexes, query optimization, database performance troubleshooting
- **Frontend (working knowledge):** HTML, CSS, JavaScript, jQuery, Knockout.js, DataTables
- **Tools:** Visual Studio, Team Foundation Server (TFS), Postman
- **Practices:** Debugging and troubleshooting, production support, code reviews, team-based development
- **Additional (training and personal projects):** Java 8, Spring Boot, Spring Security, JPA, Hibernate, JDBC, Servlets, JSP, MySQL, Git

PROFESSIONAL EXPERIENCE

Acess Meditech Private Limited

.NET Full Stack Developer | February 2025 – Present

Project: Enterprise Insurance ERP – Non-Motor Claims | Domain: Insurance | Market: Saudi Arabia

- Develop and maintain REST APIs and service-layer business logic in C# and ASP.NET Core for Non-Motor Claims workflows, including claim estimation, reserve validation and claim settlement.
- Implemented transaction-scoped processing using TransactionScope for payment-term operations that interact with related modules such as Reinsurance (RI), helping maintain data atomicity and prevent partial updates across related operations.
- Contributed to improving claims dashboard responsiveness for large volumes of records by optimizing the DataTables configuration and implementing pagination and asynchronous data loading.
- Develop and modify SQL Server stored procedures and triggers that support claims processing, and troubleshoot database performance issues through query optimization and indexing.
- Integrated external middleware APIs with backend services, and debug API and service-layer issues using Visual Studio and Postman.
- Implement and maintain document-processing functionality within the claims module.
- Support scheduled processing through Windows services and SQL Server Agent jobs, and provide production support by investigating and resolving reported issues.
- Contribute to the ongoing modernization of legacy application code toward an API-based architecture on .NET 10 / ASP.NET Core 10, and participate in code reviews and team-based development using TFS.

EDUCATION

B.E. in Electrical and Electronics Engineering | 2019 – 2023
Dr. Mahalingam College of Engineering and Technology | CGPA: 8.8/10

HSC (Higher Secondary) | 2019
Sri Aanoor Vidyalaya Matric Higher Secondary School | Percentage: 68.5%

SSLC (Secondary) | 2017
Sri Aanoor Vidyalaya Matric Higher Secondary School | Percentage: 95.6%

TRAINING AND INTERNSHIP

Java Full Stack Development Training | JSpiders

- Java development training focused on core Java concepts and practical software development skills.

Internship | NTT DATA Services

- Learned core Java concepts, including OOP, exception handling, the Collections Framework and Java 8 features, with hands-on exposure to JDBC, Hibernate and Spring.
- Built practice web applications using Servlets and JSP, and worked with Maven, JUnit, Git and the MVC design pattern.

PERSONAL PROJECT

Car Service Management | Self-work
Java 8, Spring Boot, Spring Data JPA, Spring Security, MySQL

- Built REST APIs for managing users, service carts, car services and bookings, using JPA to define relationships between entities such as User, Cart and CarService.
- Implemented JWT-based authentication, role-based endpoint security with Spring Security, and global exception handling for consistent error responses.

INTERESTS

Financial markets and stock-market research.
